

Why You Should Choose Vue

- **No build step required**
- **Easy to get started**
- **Include a script tag pointing to the latest release**

```
<head>
```

```
  <script
```

```
    src="https://unpkg.com/vue@next">
```

```
  </script>
```

```
</head>
```

Solid ecosystem

- vue-router for client-side routing
- vuex for managing state
- vue-test-utils for unit testing
- vue-devtools for debugging
- Vue Command Line Interface

Reactivity system

- Vue app creates a fully reaction root component
- Can be an event bus
- Can track dependency changes separate from the application component tree
